

Job Title: IT Project Manager

Job Description: Plan, initiate, and manage information technology (IT) projects. Work with the technical team to identify, define, and help them implement complex technical systems. Serve as liaison between business and technical aspects of projects. Plan project stages and assess business implications for each stage. Monitor progress to assure deadlines, standards, and cost targets are met. All of the above duties will be performed using a wide variety of tools mainly using JIRA, AWS, & MS Project.

Location of Work: Will work in Troy, MI and various unanticipated locations throughout the U.S. as assigned which may require relocation.

Contact: Interested applicants should clearly identify the position they are applying for in their cover letter. The resume must specifically list all post- secondary education, training or experience & must show if the applicant has any of the mentioned combination of skills relevant to the job offered. Mail resumes to Primesoft Technologies Inc, Attn: HR, 830 Kirts Blvd, Ste 380, Troy, MI 48084.
