

Job Title: Software Developer

Job Description: Design and develop computer and network software or specialized utility programs. Analyze user needs and develop software solutions. Perform entire application development life cycle involving requirement analysis, system study, designing, testing, coding, debugging, and documentation. Update software or enhance existing software capabilities. Monitor the application performances and see any anomalies which interrupts the customer experiences. All of the above duties will be performed using a wide variety of tools mainly using C++ on Linux and Unix.

Location of Work: Will work in Troy, MI and various unanticipated locations throughout the U.S. as assigned which may require relocation.

Contact: Interested applicants should clearly identify the position they are applying for in their cover letter. The resume must specifically list all post- secondary education, training or experience & must show if the applicant has any of the mentioned combination of skills relevant to the job offered. Mail resumes to Primesoft Technologies Inc, Attn: HR, 830 Kirts Blvd, Ste 380, Troy, MI 48084.
